

Parents and players, we wanted to give you some background information on the soccer match you will be playing on August 9.

Abbi's Cup is a soccer event to promote mental health awareness. The inaugural Abbi's Cup was held in August 2024 in Houston, TX in memory of Abigail Agosta. Abbi began playing soccer in Houston at a young age and reached the highest levels of the DA, GA, and then ECNL as a goalkeeper. In addition to being a strong athlete, Abbi was kind, intelligent, brave, and inclusive, as well as a compassionate friend. Beneath her brave exterior, though, Abbi suffered from Obsessive Compulsive Disorder (OCD).

Her struggles with OCD began at a young age and worsened in adolescence. She suffered daily with relentless intrusive thoughts, followed by compulsions to offset those thoughts, that even with treatment, became increasingly debilitating. Tragically, Abbi's condition did not respond to the numerous programs, treatments, and medications and her life ended in suicide at the age of 16 in March 2024.

Abbi's Cup was created to promote mental health awareness. It is our hope to normalize this discussion and empower young women to not only open up regarding their own mental health, but to be present for those around them who may be struggling. The foundational values of Abbi's Cup are courage, kindness, and inclusiveness. Abbi personified those principles, and exemplifying those values can make a difference to those who are affected.

This event brings together teams from the GA, ECNL, and independent clubs to play in a one-day event. Prior to play, the teams and spectators hear short presentations from selected speakers (including mental health professionals and/or athletes) regarding mental health in the context of athletics and daily life. At halftime, the teams are split into small groups led by mental health professionals for short open-ended discussions to foster an environment to encourage open communication.
